## **PERIMETER MONITORED ELECTRIC SECURITY FENCING**

Does your business want to save money, reduce down time and inconvenience due to vandalism and theft. Please read the following brochure on our EDS (Electric detection system) perimeter monitored electric security fencing.

### ***How does EDS Perimeter monitored electric security fencing work?***

- ❖ **Attaches to an existing perimeter fence, wall or roof, and can be constructed as a stand-alone fence.**
- ❖ **A strong visual and psychological deterrent by way of signs on the fence indicating that the fence is pulse electrified and monitored by alarm.**
- ❖ **Height of the electrified fence is a physical and psychological barrier, climbing over the fence is considered very unlikely, as it won't hold their body weight.**
- ❖ **A deterrent if contact is made with a pulse wire by the intruder. The intruder will receive a short, sharp, safe electric shock. The shock will have the effect of compelling them to release their hold through an involuntary reaction.**
- ❖ **A security alarm activation, should the intruder continue to attack or attempt to penetrate the fence by cutting, climbing over or through the fence to enter the property.**
- ❖ **A security guard response to activated alarm, which will scare off or apprehend the intruders.**

### ***How will it save me money \$?***

- **Security Guard patrols may not be required, due to fence protecting property 24/7**
- **No more theft or vandalism to property or equipment.**
- **No more down time or inconvenience due to theft and vandalism to property.**
- **Able to get insurance for property, where before property was un-insurable due to security concerns.**
- **Reduction in insurance premiums, less claims and better security in place for property.**

U R Safe Pty Ltd is police licenced, and have been in the security industry for the past 35 years. We know how important protection of your business and staff is against theft, vandalism, extortion, and assault. EDS security fencing is an excellent way to prevent the increasing crime rate and terrorist threat that exists in today's world.

Our company only uses quality Australian made security products, which are used throughout the world for security perimeter fencing in Businesses, Prisons, Government infrastructures, Military facilities, high-risk terrorist target facilities, and mine sites.

For information or **obligation free quote**, please do not hesitate to call 0419937229. We look forward to doing business with you in the near future.
